## 3. Using & Pilot Training

### 3.1 Using

You can download [Tyrant UAV Usage Manual](#) on Download page ([www.tyrantuav.com/download.html](http://www.tyrantuav.com/download.html))

### 3.2 Pilot Training & UAV pilot certificates

#### 3.2.1 IAOPA

The International Council of Aircraft Owner and Pilot Associations (IAOPA) is a nonprofit federation of 82 autonomous, nongovernmental, national general aviation organizations. Since 1962, IAOPA has represented international general aviation around the world. The combined total of individuals represented by these constituent member groups of IAOPA is nearly 400,000 pilots, who fly general aviation aircraft for business, fun, and personal transportation. Locate your local affiliate and join the fight to protect and grow general aviation.

The certificates of IAOPA are widely recognized by most countries all over the world. We have the authorization of its organization in China to conduct UAV driving training, examination and certificate issuance.

You can see more of IAOPA by here: <https://iaopa.aopa.org/>.

#### 3.2.2 Tyrant UAV training

**1) WVR (pilot within visual range)** 15 Days' offline training, **including the board and lodging.** **2) BVR (pilot beyond visual range)** 28 Days' offline training, **including the board and lodging.** **3) Online Training** If you can not come to the training base nor get the training from other channels, we suggest you take our online training which can also get you your pilot certificates by contacting us : [info@tyrantuav.com](mailto:info@tyrantuav.com)
